

**Math 620: Groups, Rings, and Fields**  
**Fall 2021**

**Instructor:** Christopher O'Neill  
**Office:** Room 570, Geology Mathematics and Computer Science (GMCS) Building  
**E-mail:** [cdoneill@sdsu.edu](mailto:cdoneill@sdsu.edu)  
**Webpage:** <http://cdoneill.sdsu.edu/teaching/f21-620>  
**Office Hours:** Monday 2:00pm - 3:30pm, 6:00pm - 8:00pm,  
Tuesday 10:00am - 1:00pm,  
Wednesday 11:00am - 12:00pm, 2:30pm - 3:30pm,  
Thursday 3:20pm - 3:50pm,  
and other times by appointment

**Course Content:** Group theory to include finite Abelian groups, isomorphism theorems, matrix groups, and permutation groups. Ring theory to include ideals, principal ideal domains, and unique factorization. Field theory to include field extensions and finite fields.

**Texts:** *Abstract Algebra - An Introduction*, 3rd Edition, by Thomas Hungerford (optional)  
*Abstract Algebra*, 3rd Edition, by David Dummit and Richard Foote (optional)

**Prerequisites:** Math 320, 522, 524, or 525 with a grade of C or better.

**Course Organization:** The class will be organized as follows.

- One class day each week (usually Tuesday), I will give a lecture on course material.
- The other class day each week will be a “problem session” wherein you work in small groups on problems designed to lead you to discover some of the course content (in particular, these problems **introduce new material**).

A problem list will be distributed at the beginning of each problem session, containing the in-class problems as well as the weekly homework problems. The in-class problems will not be turned in, but the content they introduce will be vital to the course. All completed homework problems will be turned in for credit, usually the following Thursday.

Before each problem session, a short list of “preliminary problems” will be assigned, and should be completed before the problem session. These assignments will be short, usually requiring at most 10 minutes to complete, and will be computational in nature (i.e. no proofs).

Although I intend to use this format throughout the course, I reserve the right to restructure the course as the term progresses, based in part on student feedback and performance. I will periodically collect anonymous feedback in class, but feel free to come talk to me if you have suggestions or concerns.

**Grading Policy:** Your grade will be determined by three oral exams, a cumulative final exam, weekly homework submissions, and a participation grade, weighted as follows.

Participation	10%	A = 90-100
Homework Average	50%	B = 80-89
Oral Exam 1	5%	C = 70-79
Oral Exam 2	10%	D = 60-69
Oral Exam 3	15%	F = 0-59
Final Exam	10%	
Total	100%	

The Final Exam will be a comprehensive take-home exam, completed during finals week.

**Oral Exams:** In place of timed midterm exams, there will be several oral exams administered in one-on-one meetings throughout the term. Each oral exam will last roughly 30 minutes, and will be interactive in nature. Due to time constraints, the exams will be staggered throughout the term; a sign-up for exam weeks will take place early in the term. Each exam will cover material from the previous 2 weeks of the course.

**Participation:** Attendance in problem sessions is vital to success in this class, since **new material** will be covered. Your participation grade will be based on the following:

- attending and participating in lectures;
- attending and engaging in problem sessions; and
- completing all preliminary problem.

Missing class will result in a lowered participation grade, and only university excused absences with **advance notice** to the instructor will be accepted. I reserve the right to deduct one **additional full letter grade** from your course grade if you miss too many classes, or if sufficient participation is not demonstrated during problem sessions.

**Homework:** There will be one homework assignment given each week, as well as a short list of preliminary problems before each problem session. Completed homework assignments **must be written in L<sup>A</sup>T<sub>E</sub>X** and submitted to the instructor for a grade, but preliminary problems will not be collected. Collaboration on homework is encouraged, but solutions should be written individually, and **collaborators must be identified** on the front of your assignment.

If you have not used L<sup>A</sup>T<sub>E</sub>X before, this is a fantastic skill to develop whose utility extends far beyond this course. To use L<sup>A</sup>T<sub>E</sub>X for free online, or to access numerous tutorials, visit <https://www.overleaf.com/>.

Homework assignments, along with their due dates, will be posted on the course webpage as they are assigned. Out of fairness to the other students, late homework assignments will **not** be accepted for credit. However, the lowest homework grade of the term will be dropped.

**Class Announcements, E-mail Policy and Communications:** Class announcements will be posted to my class web page and sent to your university e-mail account. Be sure to regularly check your e-mail. If you send me an e-mail, please include your name and course information (i.e. class and section) as well as any additional information that I might need to respond to your e-mail.

#### **Attendance, Absence, and Makeup Work Policies:**

- Attendance is **essential** for success in the course, especially discussion days!
- Late homework will not be accepted. However, your lowest homework grade will be dropped.
- The last day to drop this class is **September 3rd**.

#### **Student Learning Outcomes:**

- Students will be able to write clear, correct proofs of mathematical statements involving groups and rings.
- Students will be able to work together to collaboratively solve difficult mathematics problems.
- Students will be able to solve open-ended problems involving algebraic objects by formulating and proving conjectures based on observations and concrete examples.
- Students will be able to typeset written mathematics in L<sup>A</sup>T<sub>E</sub>X.

**A.D.A. Policy Statement:** The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. This legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you believe you have a disability requiring accommodation, please contact Student Disability Services.

If you require additional time on quizzes and/or exams, you must **contact me at the start of the course**. You will not be given extra time if you present this information just before an exam.

For additional information, visit [https://go.sdsu.edu/student\\_affairs/sds/](https://go.sdsu.edu/student_affairs/sds/).

**Student Privacy and Intellectual Property:** The Family Educational Rights and Privacy Act (FERPA) mandates the protection of student information, including contact information, grades, and graded assignments. Canvas will be used to communicate with students. Grades will not be posted in public spaces, and graded assignments will not be left in public spaces. Students will be notified at the time of an assignment if copies of student work will be retained beyond the end of the semester or used as examples for future students or the wider public. Students maintain intellectual property rights to work products they create as part of this course unless they are formally notified otherwise.

**Scholastic Dishonesty:** *An Aztec Does Not Lie, Cheat, or Steal, or Tolerate Those Who Do.* The San Diego State University Student Conduct Code will be enforced in this course. For the purpose of this course, cheating will be defined as (but not limited to) access or use of unauthorized material during exams and quizzes, collaboration between students during exams, quizzes or assignments for which group work is not allowed, perusal of another individual's work during exams and quizzes, copying other individual's work or allowing other students to copy your work on any assignment, quiz or exam, and having unauthorized programs or other information stored on calculators when these calculators are accessible during an exam or quiz. Note: Falsifying documentation is considered scholastic dishonesty and may result in a grade of F for the course.

For additional information, visit [http://go.sdsu.edu/student\\_affairs/srr/conduct.aspx](http://go.sdsu.edu/student_affairs/srr/conduct.aspx).
